EDUCATION

J.B. Institute of Technology

Bachelor of Science in Computer Science

Dehradun, Uttarakhand

Aug. 2023 – Aug. 2027

- **Relevant Coursework:** Data Structures, Algorithms Analysis, Database Management, Software Methodology, Artificial Intelligence, Internet Technology

EXPERIENCE

Web Development Intern

Unified Mentor

June 2024 – July 2024

Gurugram, Haryana

- Developed automated unit testing service using **Jest** and **Mocha**, reducing manual testing and enhancing bug tracking via daily tests on in-development products.
- Built and maintained CI/CD pipelines using **JavaScript** and **TypeScript** for test organization and deployment, improving QA and software quality assurance.
- Designed interactive test result dashboards using **ReactJS**, enabling swift visualization of test outcomes and accelerating bug resolution.
- Collaborated in an **Agile** environment, contributing to sprint planning and continuous delivery of features and improvements.

PROJECTS

Pipedream-lite | *Next.js 14, TypeScript, React Flow, Node.js, Prisma, PostgreSQL, Redis, Socket.IO*

2026

- Built full-stack workflow automation platform with **drag-and-drop canvas** on **React Flow**, reducing integration setup from custom code to minutes via visual pipeline composition.
- Engineered **webhook-triggered execution engine** with **BullMQ/Redis** background processing, real-time monitoring via **Socket.IO** WebSocket streams, and **Prisma/PostgreSQL** persistence.
- Deployed type-safe **REST API** with **Zod** validation across **Vercel** and **Render** with pipeline versioning and cycle detection.

Downtime.so | *Next.js 14, TypeScript, Express.js, Prisma, TanStack Query, Framer Motion*

2026

- Built self-hosted, open-source status page platform (free alternative to Statuspage.io at \$29–\$1.5K/month), enabling public status pages and incident management at scale.
- Implemented real-time updates via **Server-Sent Events (SSE)**, **email/SMS notifications**, multi-tenant isolation, and **webhook ingestion** from **UptimeRobot/Datadog**.
- Designed **REST API** with programmatic incident management, production observability, and deployment across multiple environments.

Horizon – Online Banking Platform | *Next.js 14, TypeScript, Appwrite, Dwolla, Plaid*

2024

- Built full-stack banking platform with **Plaid** for account linking, **Dwolla** for ACH transfers, and **Appwrite** for secure authentication and data management.
- Implemented real-time transaction monitoring and peer-to-peer transfers with security best practices: **JWT authentication**, input validation, and encrypted transmission.
- Delivered responsive financial dashboard with accessible UI/UX for multi-account portfolio management.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, C, HTML5, CSS3, SQL

Frontend: React.js, Next.js 14, Tailwind CSS, SASS, Framer Motion, Responsive Design

Backend & Databases: Node.js, Express.js, MongoDB, Appwrite, Convex, RESTful APIs

Cloud & DevOps: Vercel, CI/CD Pipelines, Cloud Integration, Continuous Deployment

Testing & QA: Jest, Mocha, Chai, Selenium, Automated Testing, Unit Testing, Integration Testing

Tools & Platforms: Git, GitHub, VS Code, WebStorm, Eclipse, Agile/Scrum, Plaid API, Dwolla API
